DOTS
FastTax

Precise Sales and Use tax rates for US and Canada.

Our FastTax service starts with verifying and correcting the address using our certified Address Validation engine. Using the validated address, we can accurately provide tax rates for both US and Canada.

In addition to tax rates, the service also identifies incorporated and unincorporated areas, which is essential for areas that have multiple tax jurisdictions.

How It Works

Returns Tax Rates Based on Location
Returns location specific tax rates including state/province, city, county, district and special district rates.

Provides Match Codes for Level of Accuracy
Returns match code with flag for whether tax rates for input address are provided at Address or Zip Code levels.

Identifies Incorporated and Unincorporated Areas
Flags unincorporated areas and provides the tax rates that apply.

Returns Tax Exempt Items and Other Data
Provides lists of tax-exempt items as well as other associated tax information as string-value pairs.

Features and Benefits

Pinpoint Accuracy on Sales and Use Tax Rates for US and Canada

FastTax leverages the power of our certified Address Validation engine to capture accurate address information and geo-coordinates, which are used to provide up-to-date and accurate tax data for the US and Canada.

Seamlessly Integrates with Ecommerce and Business Applications

Our real-time service is easily integrated with leading ecommerce platforms, ERPs and billing software, ensuring that you have up-to-date tax rates and eliminating the need to perform bulk tax rate updates.
